PROFILE

First Class Mechanical Engineering graduate with strong experience in CAD, engineering design, CFD, FEA and product development gained through university projects, Formula Student and practical engineering work. Confident using SolidWorks to develop engineering solutions and communicate technical concepts. Experienced working with multidisciplinary teams and customers in fast-paced environments, with a passion for helping engineers solve technical challenges and maximise the value of engineering software. IMechE Design Challenge London Winner and National Finalist.

EDUCATION

Mechanical Engineering BEng (Hons) - First Class Honours **Sep 2023 - May 2026**

University of East London

- Manufacturing - Lathe, Milling, CNC, Laser cutting, 3D Printing.
- CAD, FEA & CFD- Engine, chassis and suspension modelling; Topology and Flow simulations.
- Electronics & Computing - Arduino prototyping, programming and MATLAB simulations.

A- Levels **Sep 2021 - May 2023**

Havering Sixth Form College

1. Mathematics - A* 2. Further Mathematics - A 3. Physics - A 4. Chemistry - A

PROJECTS

Oct 2024 - Mar 2025

Technical Team Lead, UEL Racing (Formula Student)

- Produced high-level manufacturing and build plans using Gantt charts to track progress and manage dependencies.
- Liaised with external companies, sponsors and potential investors, presenting technical scope, build timelines, and resource requirements.
- Supported documentation and decision-making across multiple subsystems, gaining exposure to real-world engineering trade-offs.

WORK EXPERIENCE

Jul 2024 - Present

A&E Receptionist and NICU Ward Clerk, Queen's Hospital

- Acted as a central communication link between consultants, nurses and administrative teams, supporting smooth patient flow in a high-pressure, time-critical environment.
- Gained experience working within regulated systems, following SOPs, escalation pathways, and quality standards - directly transferable to manufacturing environments.

KEY ACHIEVEMENTS

IMechE Design Challenge 2025 London Regional Winners, National Finalist.

- Engineering design, rapid prototyping, system integration.

CFD and Intake Flow Analysis - Capstone Project

- Used SolidWorks and Ansys to investigate intake-generated flow behaviour, applying CFD setup, meshing, boundary conditions and post-processing to compare flow structures.

ADDITIONAL INFORMATION

- **Certificates:** Red Bull On-Premise Sales Job Simulation, Bronze Winning Group Submission 2023-2024 in the Engineering Futures Festival for the Startups and Enterprises, Engineering and Construction Project Award, IMechE Design Challenge.
- **Achievements:** UKMT Maths Challenge Best in Year Award 2022 & 2023
- **Software:** SolidWorks, Fusion 360, Ansys, Witness Horizon, Arduino IDE, Microsoft Office, KiCad, EasyEDA, CATIA
